PROFESSIONAL SUMMARY

Software Developer with 6+ years of experience in front-end web and OTT/Smart TV development. Skilled in building scalable web, OTT, and Smart TV applications using React JS, TypeScript, and JavaScript, delivering seamless, high-quality user experiences across platforms. Proven track record of optimizing performance, implementing accessibility standards, and resolving critical production issues for global clients in Europe and India.

CORE SKILLS

Front-End Development: React JS, Redux, React Hooks, TypeScript, JavaScript (ES6+), HTML5, CSS3, Next.js, React Native

OTT / Smart TV: Samsung TizenOS, LG WebOS, DRM, HLS, DASH, Video Streaming, Castlabs, MK Player, Shaka Player

Tools & Platforms: Git, GitLab, Gerrit, CI/CD, Docker, Jira, Bugzilla, Confluence, Postman, VS Code

Performance & Optimization: Memory Optimization, Performance Tuning, Lazy Loading, Code Splitting

Testing & Quality: Jest, Debugging, Chrome DevTools, Quality Assurance

Other: Python (automation/scripting), Node.js, Accessibility Standards, RESTful API Integration, GraphQL (Apollo), Styled Components, Tailwind CSS

PROFESSIONAL EXPERIENCE

Specialist – Front-End Developer

Tata Elxsi, Bengaluru

June 2022 – Present | 4+ Years

- Develop and optimize OTT and Smart TV applications for Samsung TizenOS and LG WebOS using React JS, ensuring smooth video playback and high-performance UI.
- Collaborate with QA teams to debug and resolve production issues, improving stability across web and TV platforms.
- Implement accessibility features to deliver inclusive and user-friendly applications compliant with industry standards.
- Design and develop interactive dashboards using Apache Superset and React for data visualization and reporting.
- Adapt and customize a common codebase to support multiple regional deployments, ensuring compliance with local requirements.
- Coordinate with regional teams to validate functionality and deliver consistent user experience across diverse markets.
- Handled critical production issues onsite at client locations in Croatia and Austria; received strong client appreciation.

Front-End Engineer

Astri Services Pvt Limited, Bengaluru

January 2020 – March 2022 | 2.3 Years

- Developed scalable e-commerce web applications using React JS with focus on performance and maintainability.
- Built reusable UI components ensuring scalability, consistency, and faster feature delivery across projects.
- Engaged in client meetings to gather requirements and deliver tailored, high-quality front-end solutions.
- Collaborated with QA teams to identify and fix UI bugs, ensuring a smooth and reliable customer experience.

KEY PROJECTS

Deutsche Telekom SmartTV Application — Built OTT apps for Samsung TizenOS and LG WebOS with smooth video playback, DRM support, and high-performance UI.

Deutsche Telekom AG Internal Project — Enhanced Smart TV app performance and optimized memory usage using profiling tools and efficient resource management.

Experimental NMS (Tejas Networks) — Delivered an AI-driven Network Management System with predictive analytics, GPON chatbot, and UFS reporting.

The Wine Park — Developed a full-featured e-commerce wine store using React JS and Material-UI with responsive design.

Factoreal — Built an online retail solution using Bootstrap and JavaScript focused on clean UI and seamless user flows.

Personal Portfolio Website — Designed and developed a responsive portfolio using React, showcasing front-end projects and professional experience. Deployed on Vercel with continuous integration from GitHub.
